DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 61, 63-65, 67, 69, 70-71 and 72-73 are rejected under 35 U.S.C. 102(e) as being anticipated by Crocker et al-5,569,184.

As to claims 61, 63-65, 67, 69, 71 and 73 Crocker-'184 (Figs. 13-16) shows distal shaft 106, proximal metal hypotube 118, port 108 communicate with inner shaft defining guidewire lumen 112, heat shrinkable sleeve 120 having port 108 as recited in the claims.

As to claims 70 and 72, from Fig. 15, in a broad sense, port 108 is formed in the region of distal shaft 106 and proximal shaft 118 as well.

Response to Amendment

The amendment filed on 8/2/2005 under 37 CFR 1.131 has been considered but moot in view of the above grounds of rejection.
